

Before using the Bowl Vaporizer first carefully read these instructions

Before first use, remove the transparent jar from the top of the Bowl Vaporizer and turn on the heating element for approximately 20 minutes to remove lubricants and oil used during the manufacturing process.

While heating up, always remove the jar from the top of the Bowl Vaporizer. The jar should only be connected to the vaporizer during vaporizing. Leaving the jar on the vaporizer without using it, may overheat the vaporizer and cause permanent damage to it.

Do not use the Bowl Vaporizer for more than 20 minutes in a row, leaving it on for a longer time than 30 minutes may reduce the life of the Bowl Vaporizer.

CAUTION: The heating element gets very hot. Keep the Bowl Vaporizer away from children.

Cleaning

The Bowl Vaporizer is an electric device: DO NOT submerge in water or use water in any way to clean the vaporizer.

When removed from the vaporizer, the transparent jar can be cleaned with water and a dish washing detergent. The rest of the Bowl Vaporizer can be cleaned with a dry cloth and by blowing off the waste residue.

How to use your Bowl Vaporizer

Remove the transparent jar from the vaporizer and switch on the heating element. Let the element heat up for several minutes. Once the element is heated up, put the herbs in the metal dish and place the transparent jar on top of the vaporizer. The herbs will start vaporizing almost immediately; the first vapors are almost invisible but you can already start inhaling. After a while, a transparent smoke will come out of the vaporizer. If real smoke appears, the heating element is getting too hot and the vaporizer must be switched off.

Slowly shake the vaporizer for better and more even vaporization. If you are not inhaling for a longer period of time, switch off the vaporizer to prevent it from overheating.

Features

100% simple to use

Excellent for use with medical herbs, oils and mixtures

Reduces smoke to almost zero

Great for indoor use

This device is intended to be used for ambiance and aroma therapy only
